آفای بازرس

Fast and reliable
peak-to-valley
surface profile
measurement

- Accurately measure surface profile on flat or curved surfaces up to 500 μm (20mils)
- Measures both average peak-to-valley and average maximum peak-to-valley height
- Portable, rugged hand-held design is ideal for field use

Elcometer 224

Digital Surface Profile Gauge

The Elcometer 224 provides the very latest in surface profile measuring technology for measuring profile on either flat or curved surfaces.

Fast reading rate of 50+ readings per minute¹

Stores up to 150,000 readings in 2,500 batches

Accurate, immediate and repeatable results

Integral & separate probe options for flat and convex² curved surfaces

Measurement capability to $\pm 5\%$

Review batch data or last 20 readings in a graph format

USB and Bluetooth® data output to ElcoMaster® data management software

User replaceable tough tungsten carbide tip

Dust and water resistant rugged design equivalent to IP64

STANDARDS:

ASTM D 4417-B, SANS 5772,
SSPC PA 17, US Navy NSI 009-32,
US Navy PPI 63101-000

Digital Surface Profile Gauge

3 measurement modes

Whichever test method or Standard you are working to the Elcometer 224 Digital Surface Profile Gauge has a range of easy to use Measurement Modes.

Custom Mode

In Custom mode, simply select to take either 5 or 10 readings per measurement then specify either the average, highest or lowest measurement of each set of readings to be displayed and saved into the batch memory³.

Standards Mode

Select the International Standard you are working to and the Elcometer 224 will automatically set the data collection method accordingly. When selecting ASTM D 4417, you can even choose if the gauge stores the average or highest reading as the measurement.

Immediate Mode

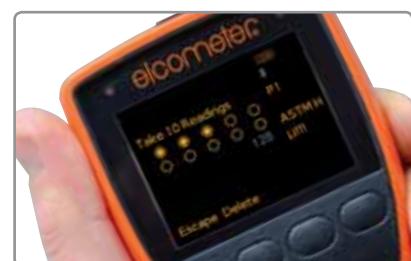

Take individual peak-to-valley measurements and save into the batch memory³. The Elcometer 224 automatically calculates and displays key statistics whilst you're inspecting, and you can set limits so the gauge will alarm whenever the reading is outside a predefined acceptable range.

Wireless Connectivity

Instantly transfer readings, statistics, and limits; via USB or Bluetooth®; to your PC or mobile device, using ElcoMaster® or your own software application, creating professional inspection reports in minutes.

Range of Measurement Modes

Select 5 or 10 readings per measurement

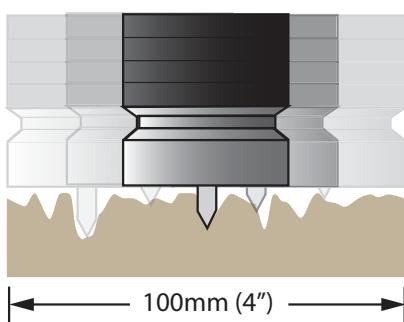

Can be used in accordance with a range of International Standards

USB and Bluetooth® data output to iPhone or Android™ devices

How to measure surface profile

1. Ensure probe is 90° to substrate to ensure accurate readings and calibrate the gauge on a glass zero tile.
2. To take one spot measurement, take either 5 or 10 readings within a 100mm (4") diameter area.
3. The measurement displayed is either the average peak-to-valley height or the maximum reading of the 5 or 10 readings, depending on which measurement mode you have selected.
4. To establish the average surface profile of an area, record 5 spot measurements for each 1m x 1m (3ft x 3ft) area.

¹ Convex probe up to 25 readings per minute

² Applicable Patents: GB2505193, US9261345

³ Model T only

Elcometer 224

Digital Surface Profile Gauge

User Friendly

- Large buttons ideal for gloved hands
- Easy to use menus in multiple languages
- High contrast colour LCD with auto rotate
- High and low reading limit indicators
- Factory calibrated for immediate use

Accurate

- Can be used in accordance with National and International Standards
- Temperature stable measurements
- Statistics are calculated and displayed in real time
- Live and batch readings graph format for instant analysis

Reliability

- Repeatable and reproducible measurements
- 2 year gauge warranty²
- Supplied with fully traceable Test Certificates
- Batch & individual readings are date and time stamped

Tough

- Sealed, heavy duty and impact resistant
- Dust and waterproof equivalent to IP64
- Suitable for use in harsh environments
- Scratch and solvent resistant display
- Durable gauge and probe construction

Efficient

- Fast reading rate of 50+ per minute
- Integral and separate probe versions to suit your application
- Alphanumeric batch identification
- Compatible with ElcoMaster® software and ElcoMaster® Mobile App
- Powersave Mode with tap awake

Powerful

- User replaceable tough tungsten carbide tip can be used for up to 20,000 readings
- USB and Bluetooth® data output to iPhone¹ or Android™ devices
- Measures profiles up to 500µm (20mils)

Integral or separate probes measure profiles up to 500µm (20mils)

Ergonomic design for comfort during continuous use

2.4" colour screen provides enhanced reading visibility at all angles

¹ Compatible with iPod, iPhone and iPad.

² The Elcometer 224 is supplied with a 1 year warranty against manufacturing defects. The warranty can be extended free of charge to 2 years within 60 days of purchase via www.elcometer.com.

Digital Inspection Kits

Three **specialist Surface Profile**, **Climate** and **Coating Thickness** Gauges in one **cost-effective**, **easy to use kit**

Quality Without Compromise

Digital Inspection Kits

These digital inspection kits have been specifically designed to undertake the three principal inspection requirements in the Protective and Industrial Coatings Industry – climate, surface profile and dry film thickness. Ideal for 'paperless' quality assurance systems the kits come complete with ElcoMaster® software for professional reporting and analysis.
