

# Separate Probe Densitometer

## DT-200

- Separate Probe Type Densitometer
- High Accuracy  $\pm 0.03$  D
- 10 Points Calibration
- Big Display Screen with backlight
- Extremely wide light range of between 650 Cd/m<sup>2</sup> and 320 000 Cd/m<sup>2</sup>
- Carrying case included

The DT-200 is a robust, easy to use, separate probe type densitometer for measuring the transmission density of x-ray film. The unit has been designed for using in one-site mobile darkrooms, laboratories and offices.

#### Standard Components:

Main unit: 1  
Instruction manual (English): 1  
Carrying Case: 1

#### Optional Components:

AGFA Density Strip, 15-step, certified
